

Tokenomics Overview

Total Supply:

1 Billion SYN tokens

Purpose and Vision:

SYNAPSE A.I aims to revolutionize the integration of Artificial Intelligence and blockchain. The SYN token serves as the backbone of the ecosystem, driving governance, utility, and incentivizing contributions.

Token Allocation Breakdown

Category	Percentage	Tokens (in Millions)	Details
Community Allocation	45%	450	Rewards, airdrops, and grants to foster ecosystem participation and development.
– Rewards	30%	300	Incentives for staking, liquidity mining, and ecosystem activities.
– Airdrops & Giveaways	5%	50	For early adopters, creating a loyal user base.
– Grants & Ecosystem Growth	10%	100	To fund projects, developers, and partnerships to expand the ecosystem.
Core Team & Advisors	20%	200	Vesting schedules to ensure long-term alignment.
– Team Allocation	15%	150	Core team allocations with 3 - 5 year vesting schedules.
– Advisors	5%	50	Strategic advisors with 1 - 2 year vesting periods.
Reserve & Treasury	15%	150	Reserved for strategic opportunities, partnerships, and unexpected expenses.
Private & Public Sale	15%	150	Fundraising for early development and growth.
– Private Sale	10%	100	Early-stage investors with vesting to avoid price

Category	Percentage	Tokens (in Millions)	Details
			volatility.
– Public Sale	5%	50	Retail investors during the ICO/IDO phase.
Marketing & Partnerships	5%	50	To fund campaigns, influencer collaborations, and brand awareness.

Vesting Schedules

Category	Vesting Period	Cliff Period	Purpose
Team Allocation	3 – 5 years	6 months	Ensures team commitment to the long-term vision.
Advisors	1 – 2 years	3 months	Rewards strategic contributors while mitigating market impact.
Private Sale	1 – 2 years	3 months	Gradual release to prevent early investor sell-offs.
Community Rewards	None	None	Continuous incentives for user participation in the ecosystem.

Utility of SYN Tokens

Utility	Description
Governance	Token holders can vote on important ecosystem decisions, including upgrades and partnerships.
AI Services	Pay for premium AI services, tools, and data sets within the SYNAPSE A.I ecosystem.
Staking Rewards	Earn rewards by staking SYN tokens and contributing to network security and decentralization.
Ecosystem Growth	Grants to developers and contributors building on the SYNAPSE A.I platform.

Token Allocation Visualization

The chart below illustrates the distribution of SYN tokens visually:

Token Allocation for SYNAPSE A.I

Deflationary Mechanism

To ensure long-term value retention and scarcity, SYNAPSE A.I will introduce the following deflationary features:

Token Burns:

A portion of transaction fees (e.g., 0.5%) will be burned regularly.

Fee Redistribution:

20% of ecosystem fees will be reallocated to staking pools or burned to reduce circulating supply.

Projected Token Flow

Time Period	Tokens Released (%)	Cumulative Tokens (Millions)	Allocation Source
Year 1	25%	250	Community rewards, private/public sales.
Year 2	20%	200	Staking rewards, gradual team token unlocks.
Year 3 - 5	40%	400	Continued team allocation, ecosystem growth.
Beyond Year 5	15%	150	Reserve for ecosystem sustainability.

Key Highlights for Pitch

- **Sustainable Growth:**
Allocations ensure long-term value creation and support ecosystem scalability.
- **Alignment of Incentives:**
Vesting schedules align core team, advisors, and investors with the project's goals.
- **Community-Centric Design:**
The majority (45%) of tokens are reserved for community participation and ecosystem development.
